Welcome to
your new Switchee
Controlling your Heating
& Hot water

Switchee User Guide

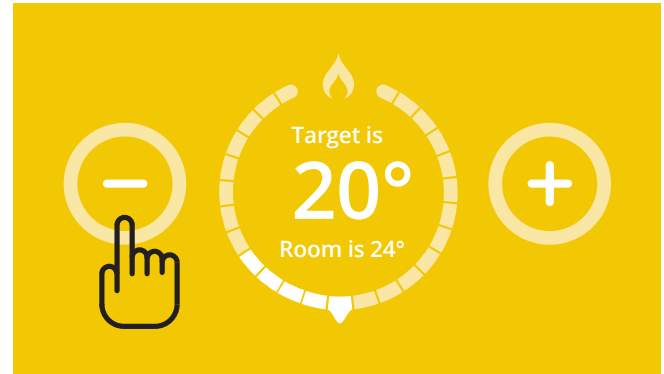

Controlling your Heating

Increase your temperature

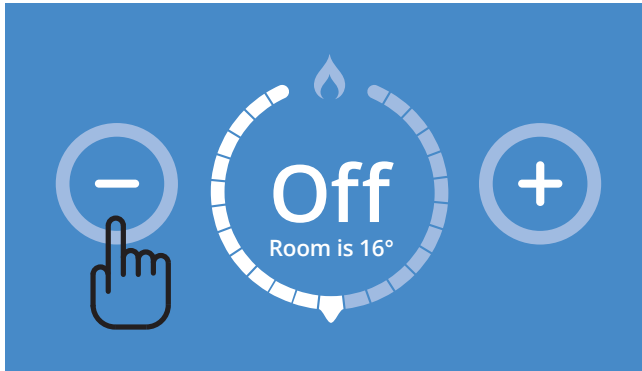

To INCREASE the room temperature, repeatedly press the **+** button on the Switchee until your **target temperature** is displayed centrally. The flame icon/symbol will be highlighted when the Heating is turned ON.

Decrease your temperature

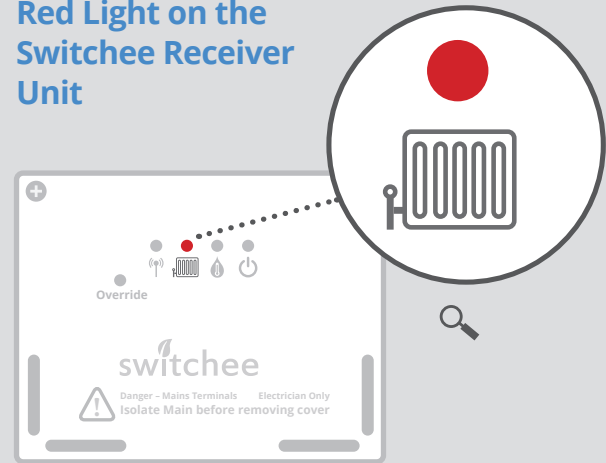

To DECREASE the room temperature, repeatedly press the **-** button on the Switchee until your **target temperature** is displayed centrally.

Turn your Heating OFF

Repeatedly press the minus **button**  on the **Switchee** until the Target temperature (large number displayed centrally) is below the room's actual temperature (smaller number displayed below the target temperature).

Red Light on the Switchee Receiver Unit

Heating is ON

When the Heating is turned ON, a red light above the Heating (radiator) icon will come ON, indicating the Heating system should be providing heat.

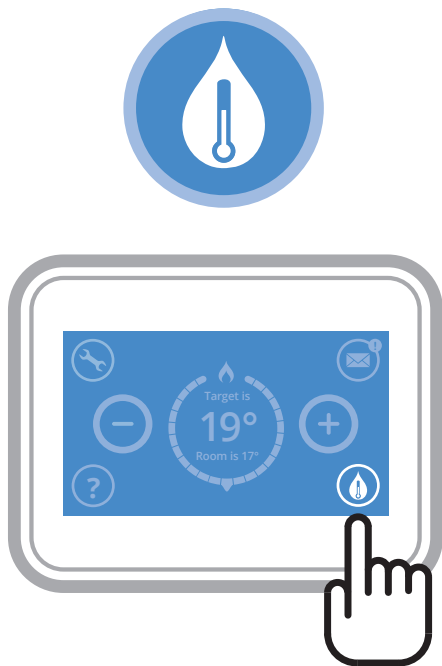

Heating is OFF

When the Heating is OFF, the red light above the Heating (radiator) icon is OFF.

Controlling your Hot Water

The Hot Water Button

If your **Switchchee** controls your Hot Water...

Turning Hot Water ON

On your **Switchchee** press the **Hot Water button** (water droplet) located in the **bottom right corner** of the screen. The display will then show “Hot Water ON”.

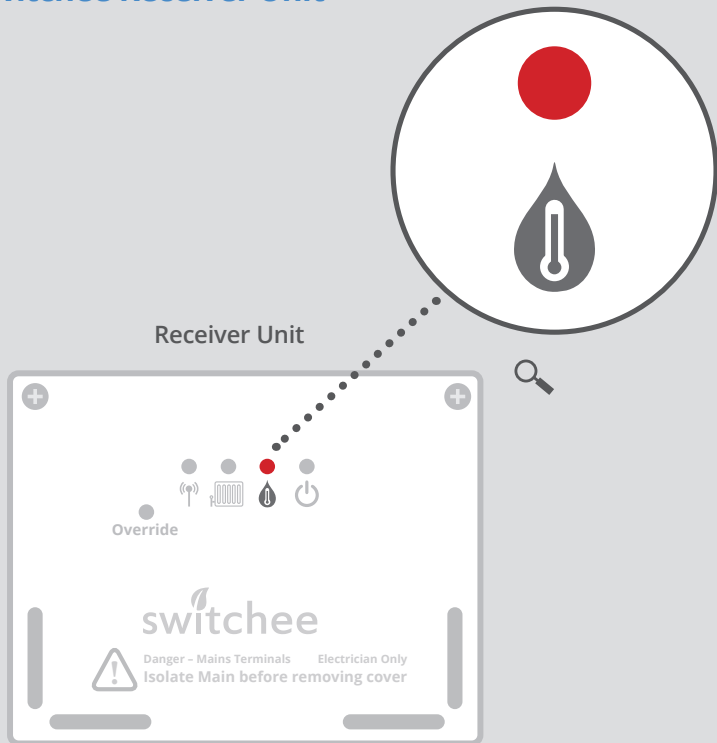

Turning Hot Water OFF

On your **Switchchee** press the **Hot Water button** (water droplet) again. The display will then show “Hot Water OFF”.

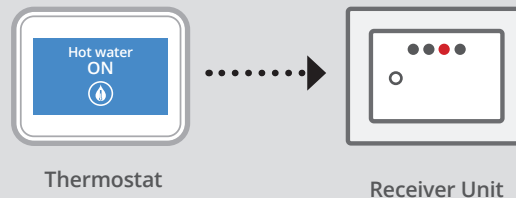

Red Light on the Switchee Receiver Unit

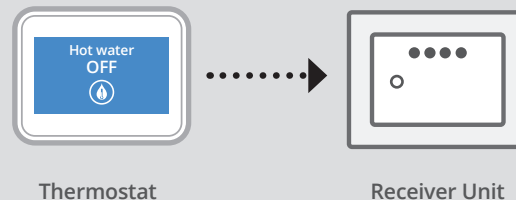

Hot Water is ON

When the Hot Water is ON, a red light above the Hot Water icon will come ON, indicating the boiler should be providing Hot Water.

Hot Water is OFF

When the Hot Water is OFF, the red light above the Hot Water icon is OFF.
