

# Manually controlling your heating and hot water

Switchee user guide

# Manually changing your heating

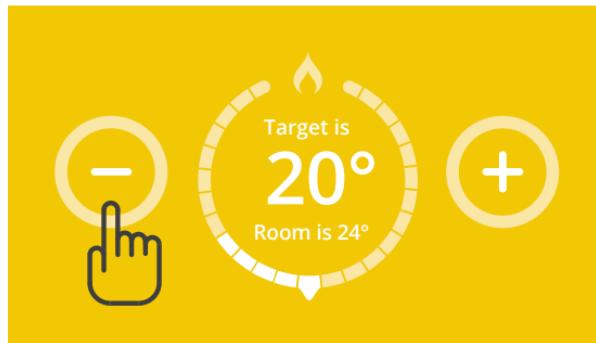

## Increase your temperature

To increase the temperature, press the **+** button until the target temperature (the large number in the middle) is the temperature you would like your property to be.

If the target temperature is higher than the room temperature, the flame will turn white, and your heating will turn on.

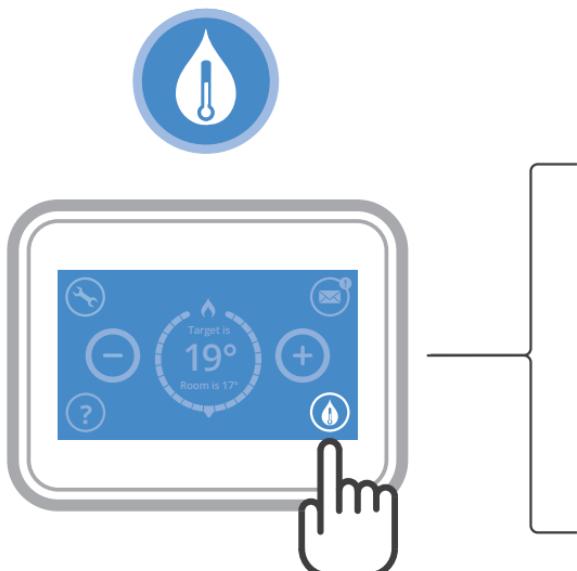

## Decrease your temperature

To decrease the temperature, press the **-** button until the target temperature (the large number in the middle) is the temperature you would like your property to be. If the target temperature is lower than the room temperature, the flame will turn grey, and your heating will turn off.

# Controlling your hot water

## The hot water button

If your **Switchee thermostat** controls your hot water...

### Turning hot water ON

On your **Switchee thermostat** press the hot water button (water droplet) located in the **bottom right corner** of the screen. The display will then show **hot water ON**.

### Turning hot water OFF

On your **Switchee thermostat** press the hot water button (water droplet) again. The display will then show **hot water OFF**.
